“Patients have better results when they sense that their doctor cares about them.”

About Elyn Lanfranco Delgado, MD

Dr. Elyn Lanfranco Delgado loves “establishing long-term relationships with patients.” Communication and active listening are key in his practice. “Patients have better results when they sense that their doctor cares about them,” he says. He loves caring for the senior population. “Seniors have worked hard so that our generation can do better,” he explains. He wants patients to know they can trust him “not only for their medical needs but also for the family, social, and personal well-being.” If he could change anything about healthcare today, he would increase availability of resources for patients.

Dr. Delgado loves spending his free time with family. He also likes playing table tennis and going to the beach.
